Who We Are

Exillien Softech Private Limited is a Jaipur-based technology company building cloud software for businesses that run on complex, everyday operations — automobile dealerships and workshops, petrol pumps, transport fleets, fitness centres and large enterprise field-service networks.

We don't begin with a template. We begin with how a business actually works, then build, customise, integrate and roll out the technology to match it — and stay on as a long-term technology partner after go-live.

Automobile

Petrol Pump

Transport

Fitness

Field Service

With deployments spanning India and international engagements across the UAE, Vietnam, the USA and the wider Gulf region.

OUR STORY

Built On Real-World Experience

What began as hands-on software work for local automobile and fuel-retail businesses has grown into a complete technology ecosystem — without losing the close, practical understanding of day-to-day operations that started it all.

What We Bring Together

A single technology partner across the full lifecycle — not just a software vendor.

Domain Expertise

Deep understanding of automobile, fuel-retail, transport, fitness and field-service operations.

Custom Engineering

Software built and configured around your exact workflows — not the other way round.

Systems Integration

APIs and integrations that connect your platform to the systems you already run.

Enterprise Rollout

Multi-location deployment, data migration and hands-on training for every team.

Long-Term Support

AMC, helpdesk and continuous enhancement long after go-live.

DOMAIN EXPERTISE + PRODUCT ENGINEERING + INTEGRATION + DEPLOYMENT + SUPPORT

HOW WE WORK

Technology Built Around Your Business

Every organisation has different workflows, approval processes, reporting requirements and customer journeys. So we don't force your business into a rigid, one-size-fits-all system.

"From ready-to-deploy platforms to fully customised enterprise applications, we build solutions that fit the way your business actually works."

Workflows

Approval chains

Reporting formats

Operational structure

Integrations

Customer journeys

Business rules

Faster user adoption

Lower total cost of ownership

A system that fits, not a workaround

HOW WE GET THERE

Understand

Your business, not just your brief

Design

Architecture and experience

Build & Integrate

Develop, connect, configure

Roll Out

Deploy, migrate, train

Support & Evolve

Long-term partnership

OUR SOLUTION ECOSYSTEM

One Ecosystem, Six Products

Purpose-built platforms for the industries we know best — engineered on shared, modern technology foundations.

Auto Genius

Cloud DMS & ERP for automobile OEMs, dealers, workshops and showrooms.

Petro Genius

Cloud accounting, billing and inventory management for petrol pumps.

Transport Genius

Fleet, freight and logistics management for transport operators.

Genius Gym

Membership, engagement and operations platform for fitness businesses.

Field Service & Rollout

Enterprise field-force apps plus pan-India rollout, training and deployment.

Trade Genius

Inventory and stock ERP for warehouses, traders and franchise networks.

Auto Genius — Dealership & Workshop Platform

A cloud DMS and ERP for automobile OEMs, dealers, workshops and showrooms — covering conventional and electric vehicles, two-wheelers to four-wheelers.

DMS & ERP for OEM

- Multi-dealer, multi-location network
- Global lead & spare-stock visibility
- Warranty & scheme management
- GST-ready sale/purchase reports

Authorised Dealer Workshop

- Sales & workshop management
- Inventory liquidity reports
- Area & model-wise sales reporting
- ABC analysis & mobile access

Multibrand Workshop

- Universal vehicle compatibility
- Job card, billing & invoicing
- Lead & enquiry management
- Financer-wise outstanding

Pre-Owned Vehicle

- Body condition & tyre reports
- Photo & video inspection
- Ownership & insurance tracking
- Expense evaluation

AVAILABLE AS MOBILE APPS

AutoGenius

Dealer & service operations

Genius Rider

Customer service booking

AutoGenius ERP

OEM ↔ distributor ↔ dealer, EV-ready

Petro Genius — Petrol Pump Software

Cloud-based accounting, billing and inventory management purpose-built for petrol pumps, bunks and fuel distributors — fully GST/VAT-ready.

Salesman & Shift Management

Schedule shifts, monitor performance and track time at the pump.

DIP, Tank & Bowser Sales

Daily DIP, tank-wise stock and bowser-linked sales tracking.

Credit Sales & Indent

Credit limits, indent approval and consolidated statements.

GST-Ready Accounts

Trading account, P&L, balance sheet and bank reconciliation.

Stock & Inventory Reports

Item, location and salesman-wise stock visibility.

Analytical & Graphical Reports

Sales, purchase and cash-flow trends, visualised.

Personalised dashboards for pump owners and credit customers, with dedicated mobile apps for salesmen and credit customers on iOS & Android.

Field Service Management Platform

A mobile-first platform for enterprise field operations — built for large organisations managing distributed technician networks and service requests across many locations.

Job Allocation & Scheduling

- Real-time job assignment
- Technician availability & routing
- Priority-based scheduling
- Location-aware dispatch

Technician Workflows

- Digital job cards & checklists
- Full service history on hand
- Photo & signature capture
- Offline-capable mobile access

Real-Time Service Tracking

- Live job status updates
- Service request visibility
- SLA & turnaround monitoring
- Automated escalation alerts

Mobile-First Field App

- Native Android & iOS apps
- Built for low-connectivity areas
- Push notifications
- Integrated with backend systems

Designed for enterprise dealer and service networks operating across hundreds of locations — and rolled out, trained and supported by our own team.

Proven At Enterprise Scale

Beyond development, we deploy and support technology across large, distributed networks — training every team, at every location.

JCB

Field-force app rollout and training across JCB's dealer network in India, improving job scheduling and real-time service data access.

Hero

Dealership and sub-dealership rollout across Hero's network, with hands-on staff training end to end.

Wipro × Mahindra

Application rollout for Mahindra Four Wheelers dealerships, delivered in partnership with Wipro.

Ultraviolette

Onsite and offsite implementation support for Ultraviolette's COCO and DODO outlets.

Transport Genius — Fleet & Freight Management

A complete transport management system covering goods receipt, challan booking, fleet trip tracking and invoicing — built for logistics operators and fleet owners.

Goods Receipt (Bilty)

- GR types — TBB, TP or Paid
- Multiple pick-up & drop points
- GST-compliant billing party setup
- E-way bill number tracking

Challan Booking & TDS

- Single challan for multiple GRs
- Driver advances & diesel tracking
- Automatic TDS on lorry payments
- Shortage tracking & confirmation

Trip Sheet & Fleet

- Real-time trip expense tracking
- Fuel & pump-wise records
- Diesel stock reconciliation
- Odometer-based mileage

Invoicing & Payments

- Consolidated invoice, multiple GRs
- Customisable extra charges
- GST applied by payee
- Pending amount after deductions

REPORTING SUITE

Operational: GR, Pending GR, Challan, Shortage, Party-wise & Lorry Summary reports

Accounting: Day Book, Trial Balance, TDS, Party Outstanding, Profit & Loss and Balance Sheet

Genius Gym — Health Club & Gym Management

An all-in-one platform for memberships, engagement, staff and reporting — built for gyms and fitness studios.

Biometric Access Control

24/7 RFID & biometric entry with real-time attendance tracking.

WhatsApp Engagement

Automated reminders, renewals, promotions and two-way messaging.

Staff & Payroll

Role-based access, attendance-linked payroll and trainer commissions.

Reporting & Analytics

Revenue, membership and staff-performance dashboards.

Lead Management

Capture and convert leads from Instagram, Facebook and more.

Cafe Management

Inventory, suppliers and member-account billing for the gym cafe.

Member App — Workout & nutrition plans, progress tracking, payments — on iOS & Android

Trainer App — Custom programs, session tracking, adherence & revenue insights

Beyond The Core: Finance & Trade

Two further platforms extend the ecosystem into lending and warehouse/trade operations — built on the same tailor-made approach.

Vaaniya

Loan and finance management software for financiers — covering disbursement, EMI tracking, settlements and collections.

- Multi-guarantor loan files with flexible interest rates
- Flat or reducing-balance interest modes
- Pre-closure, foreclosure & account settlement
- Branch-wise collections with SMS alerts
- EMI due, recovery & P&L reporting

Trade Genius

GST-ready inventory and stock ERP for warehouses, traders and OEM franchise networks.

- Purchase, sales & stock adjustment entries
- Dealer ordering & multi-location management
- GST-ready invoicing with audit trail
- Item-wise ledger & movement reports
- Employee login & rights management

Built For Your Business. Designed For Your Future.

When a ready-made module isn't enough, our engineering team builds around your process directly — web, mobile, integration and reporting alike.

Custom Web Applications

Bespoke platforms and portals built around your exact process.

Custom Mobile Applications

Native Android & iOS apps for customers, staff or field teams.

API & Third-Party Integration

SAP, Google Maps, payment gateways and other business systems.

Workflow Automation

Automating approvals, alerts and routine operational tasks.

Custom Dashboards & Reporting

Purpose-built views for the metrics that matter to you.

Industry-Specific Extensions

Modules and features tailored to your specific segment.

Every integration and customisation is scoped around your existing systems — not built in isolation from them.

From Development To Deployment — End to End

Our role doesn't stop at development. We implement, roll out and stabilise the technology inside your business, then keep improving it.

End-to-End Enterprise Rollouts

- Multi-location, multi-dealer deployment
- Phased rollout planning & coordination
- Pan-India delivery network

Onsite Training & Enablement

- Hands-on staff training at every site
- SOP handbooks & checklists
- Reduced learning curve, faster adoption

Data Migration & Sign-off

- Secure, structured data migration
- SOP sign-off with stakeholders
- Minimal disruption during cutover

Staff Augmentation & Coordination

- On-payroll trained resources on-site
- TA/DA compliance & coordination
- Dedicated rollout project management

Engineered To Be Trusted

The same foundations run under every product — cloud-native, secure by design, and built to stay online.

Cloud-Based Access

Work securely from anywhere, anytime

Safe & Secure

VAPT-tested, hardened infrastructure

Multilingual Support

Built for diverse, multi-region teams

Fast & Easy to Use

Modern interfaces, minimal training time

Dedicated Customer Support

AMC & ticket-based helpdesk

DevOps & CI/CD

Structured releases & version control

Private Cloud Hosting

Dedicated servers, backup & monitoring

VAPT Security Testing

Vulnerability assessment & penetration testing

One Disciplined Process, Every Engagement

The same eight-stage process applies whether we're configuring a ready-to-deploy platform or engineering a fully custom enterprise application.

Five Reasons Enterprises Partner With Us

Deep Domain Understanding

We know automobile, fuel-retail, transport, fitness and field-service operations from the inside — not just the software around them.

Tailor-Made, Not Templated

Every engagement starts with how your business actually works, not a fixed feature list.

Product + Custom Engineering

A mature product ecosystem, backed by the engineering depth to build exactly what a ready-made platform can't.

Enterprise Rollout Expertise

Proven, pan-India rollout capability for large, multi-location and multi-dealer networks.

Long-Term Technology Partnership

AMC, helpdesk and continuous enhancement — we stay on as your partner after go-live.

Trusted By Leading Brands

A cross-section of the automobile, EV and mobility businesses that run on Exillien technology today.

Hero

Wipro

JCB

Murugappa Group

OUR PEOPLE

Powered By Technology & Domain Expertise

Behind every product is a focused team of engineers, product specialists and rollout professionals — organised around the industries we serve, not just job titles.

Automobile & Dealer Technology

Petroleum Systems Engineering

Fitness & Wellness Technology

Transport & Logistics Engineering

Cloud & Mobile Engineering

Security & Quality Assurance

What Drives Us Forward

VISION

To be a trusted, long-term technology partner for organisations across automobile, petrol pump, transport, fitness and field-service industries — delivering scalable, business-specific digital solutions.

MISSION

To understand businesses deeply, simplify complex operations, and build technology around real workflows — delivering reliable, scalable software and standing beside our clients long after go-live.

VALUES

- Innovation
- Integrity
- Customer Centricity
- Excellence
- Long-Term Partnership

Let's Build Technology Around Your Business

From ready-to-deploy platforms to fully customised enterprise applications — we're ready when you are.
