Tally + WhatsApp

Connected, out of the box

Role-Based Access

People see what they need

WHY FUELINT EXISTS

One connected system, not *scattered pieces*

Petrol pumps generate information all day and see very little of it. Readings, credit slips, purchases and collections end up in registers, spreadsheets and separate apps that never talk to each other.

WITHOUT FUELINT

Scattered across tools

-  Billing register
-  Stock notebook
-  WhatsApp chats for reminders
-  In the manager's memory

WITH FUELINT

One connected system

-  Sales ✓
-  Stock ✓
-  Credit ✓
-  Accounts ✓

ALL SYNCED · ONE FUELINT CORE

WHO IT'S FOR

Single Pump Owners

Better control over daily sales, stock, credit and accounts.

Multi-Pump Operators

Centralized control and visibility across every location.

Dealer Networks

Standardised process, roles and consolidated reporting.

Growing Businesses

Start with one pump, expand without changing systems.

Real forecourts. Real operations.

One pump today. Multiple pumps tomorrow. **One connected system throughout.**

MULTI-PUMP MANAGEMENT

One business. Many pumps. One view.

Fuelint's biggest difference is what happens when you own more than one location. Move from a consolidated view of the whole business straight down to a single pump — without switching systems or logins.

- 1 Consolidated performance across every location you own
- 2 Drill down from All Locations to a single pump in one click
- 3 Compare pumps side by side to see what's working
- 4 Standardise operations, roles and reporting group-wide

COMPLETE ERP

Everything the business runs on, connected

No disconnected registers, no re-entering the same numbers. Every part of Fuelint feeds the next, so records stay consistent from the pump to the balance sheet.

Sales & Purchase

Record every fuel and non-fuel transaction, purchase and supplier bill in one flow.

Inventory & Stock

Track tank stock, lubricants and consumables with movement that reconciles.

Credit Customers

Manage credit accounts, outstanding balances and collections.

Accounting

Ledgers, statements and GST-ready records from daily operations.

Analytics & Reports

Understand trends, compare periods, see where performance moves.

Users & Roles

Give owners, managers, accountants and operators the right access.

Built around real forecourt operations — not a generic back-office screen.

FUELINT FITS INTO HOW YOU ALREADY WORK

Connected to the tools your business *already relies on*

Two of the strongest reasons pump owners choose Fuelint: your accountant keeps working in Tally, and your customers get answers on WhatsApp — without anyone re-typing a thing.

MAJOR USP · ACCOUNTING

Fuelint + Tally

Move accounting data between Fuelint and Tally instead of maintaining two sets of books. Run the pump in Fuelint — keep your accounting workflow connected with Tally.

- ✓ Reduce duplicate data entry between systems
- ✓ Keep operational and accounting records aligned
- ✓ Accountant keeps the familiar Tally workflow

 **Fuelint Ledger**  **Tally**

MAJOR USP · COMMUNICATION

Fuelint + WhatsApp

Turn every customer communication into a simple WhatsApp message — statements, reminders and updates reach customers and staff on the channel they already use every day.

- ✓ Customer statements sent without manual follow-up
- ✓ Outstanding & collection reminders, automatically
- ✓ Operational alerts reach staff where they already are

Statement ready

Your outstanding balance is ₹12,400. Pay by 28th to avoid a reminder call.

MORE WAYS TO CONNECT

SMS Gateways

Reach customers and staff on the channels they already use.

API Access

Connect Fuelint with your own systems where you need a deeper link.

Automated Alerts

Stock levels, outstanding balances and unusual movements.

Scheduled Reports

Recurring summaries delivered on a routine you set.

TAILOR-MADE, NOT OFF-THE-SHELF

Your workflow. Your rules. Your software.

Fuelint can be shaped around how your business actually runs — custom reports, screens and business rules, additional modules, and integrations beyond Tally and WhatsApp where your operation needs them.

Custom workflows

MOBILE

Your pump in your pocket.

Owners rarely sit at a desk. Fuelint on mobile gives you the numbers that matter, wherever you are — and lets your team capture what they need right from the forecourt.

Shift · Nozzle 2

Meter open	48,210 L
Fuel sold	612 L
Payment mode	Cash + UPI

Tank – HSD	64%

ON THE MOVE

- ✓ Live view of sales, stock & collections
- ✓ Switch between locations on the move
- ✓ Capture readings from the forecourt
- ✓ Notifications when something needs you

ROLE-BASED PLATFORM

The right screen for every person

Fuelint adapts to the role, so nobody wades through screens they don't need — and sensitive information stays where it belongs.

Owner

See every location, compare performance, stay in control from anywhere.

Manager

Run daily operations, shifts and stock for the pump you're responsible for.

Accountant

Work with clean, connected records instead of reconciling scattered files.

Operator

Capture readings and transactions quickly, with only the screens that matter.

COMPARISON

Why generic tools *fall short* for petrol pumps

Fuel retail involves rapid shift cycles, tank reconciliation, credit customers and specialised day books — workflows that spreadsheets and generic accounting software were never built to handle.

CAPABILITY	SHEETS	GENERIC	FUELINT ERP
Shift & Sales Management	×	×	✓ Connected shift & payment tracking
Fuel Tank & Lube Inventory	×	⚠	✓ Real-time tank & lube reconciliation
Credit Statements & WhatsApp	×	⚠	✓ Instant statements & WhatsApp / SMS
Multi-Pump Oversight	×	×	✓ Single login, one or many pumps
Tally & Accounting Sync	×	⚠	✓ Seamless Tally integration & day books

Reports & Analytics

FROM DATA TO UNDERSTANDING

Numbers that explain themselves

- ✓ Trends across days, weeks and months
- ✓ Period and location comparisons built in
- ✓ Attention callouts for unusual movements
- ✓ Reports your accountant can work from

Integration-ready architecture

One ERP core that connects outward — Tally, WhatsApp, SMS, APIs and the banking or custom systems your business already depends on.

White-label for partners & dealers

For dealer networks and partners, Fuelint can be configured as a branded, customised deployment — your brand, your platform, your market.

WHY TEAMS CHOOSE FUELINT

**Built for fuel retail**

Not a generic ERP bent into shape — every screen is designed around how a petrol pump actually runs.

**Multi-pump from day one**

One pump today, a network tomorrow. The same platform scales without a migration.

**Control, not guesswork**

Role-based access, connected records and automated communication keep the business tight.

Ready to run your petrol pump business smarter?

Book a walkthrough and our team will map Fuelint to your service, billing, credit and inventory workflows — single pump or multi-pump network.
