

AUTOMOBILE BUSINESS MANAGEMENT SOFTWARE

Automobile operations, connected for clarity.

One platform for billing, job cards, spare parts, customers and reporting — so your whole operation works from a single, connected source of truth.

Workshops

Dealerships

Dealer Networks

OEM Outlets

THE CONNECTED CORE

 Billing & Invoicing

 Job Cards

 Parts & Inventory

 Customers & Vehicles

 Reports & Analytics

Cloud-Based

Hosted & always on

Dedicated Server

On your infrastructure

Anytime, Anywhere

Any device, any site

Data Security

Protected & backed up

WHY WHEELINT EXISTS

One connected system, not scattered pieces

WITHOUT WHEELINT

Scattered across tools

Billing app

Job register

Stock spreadsheet

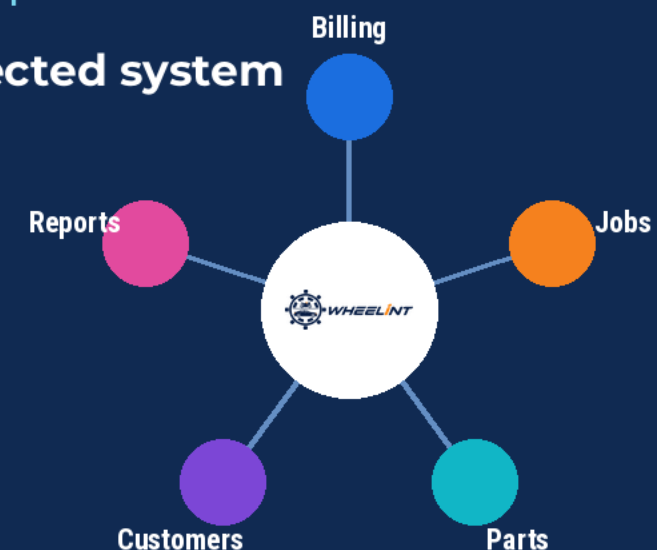

WhatsApp notes

Paper cards

In someone's memory

WITH WHEELINT

One connected system

WHO IT'S FOR

Workshops

Independent & multibrand service centres.

Dealerships

Sales, service and spares under one roof.

Dealer Networks

Multi-location groups with shared standards.

OEM Operations

Enterprise oversight across authorised outlets.

THE PLATFORM

Every core operation, connected

Enter information once and it stays useful everywhere else. The records are linked, not copied between separate tools — so nothing drifts out of sync.

Vehicle

Job Card

Technician

Parts

Billing

Reporting

Billing & Invoicing

Service and parts invoices with tax, discounts and payment status tracked to every vehicle.

Job Cards & Service

Estimate to delivery with clear status, assigned technicians and a full service record.

Parts & Inventory

Stock across stores, reorder alerts and every part tied to the job that used it.

Customers & Vehicles

Every owner, vehicle and visit in one place — answers without digging through files.

Workshop Operations

Appointments, bay load and technician workload, planned before the day starts.

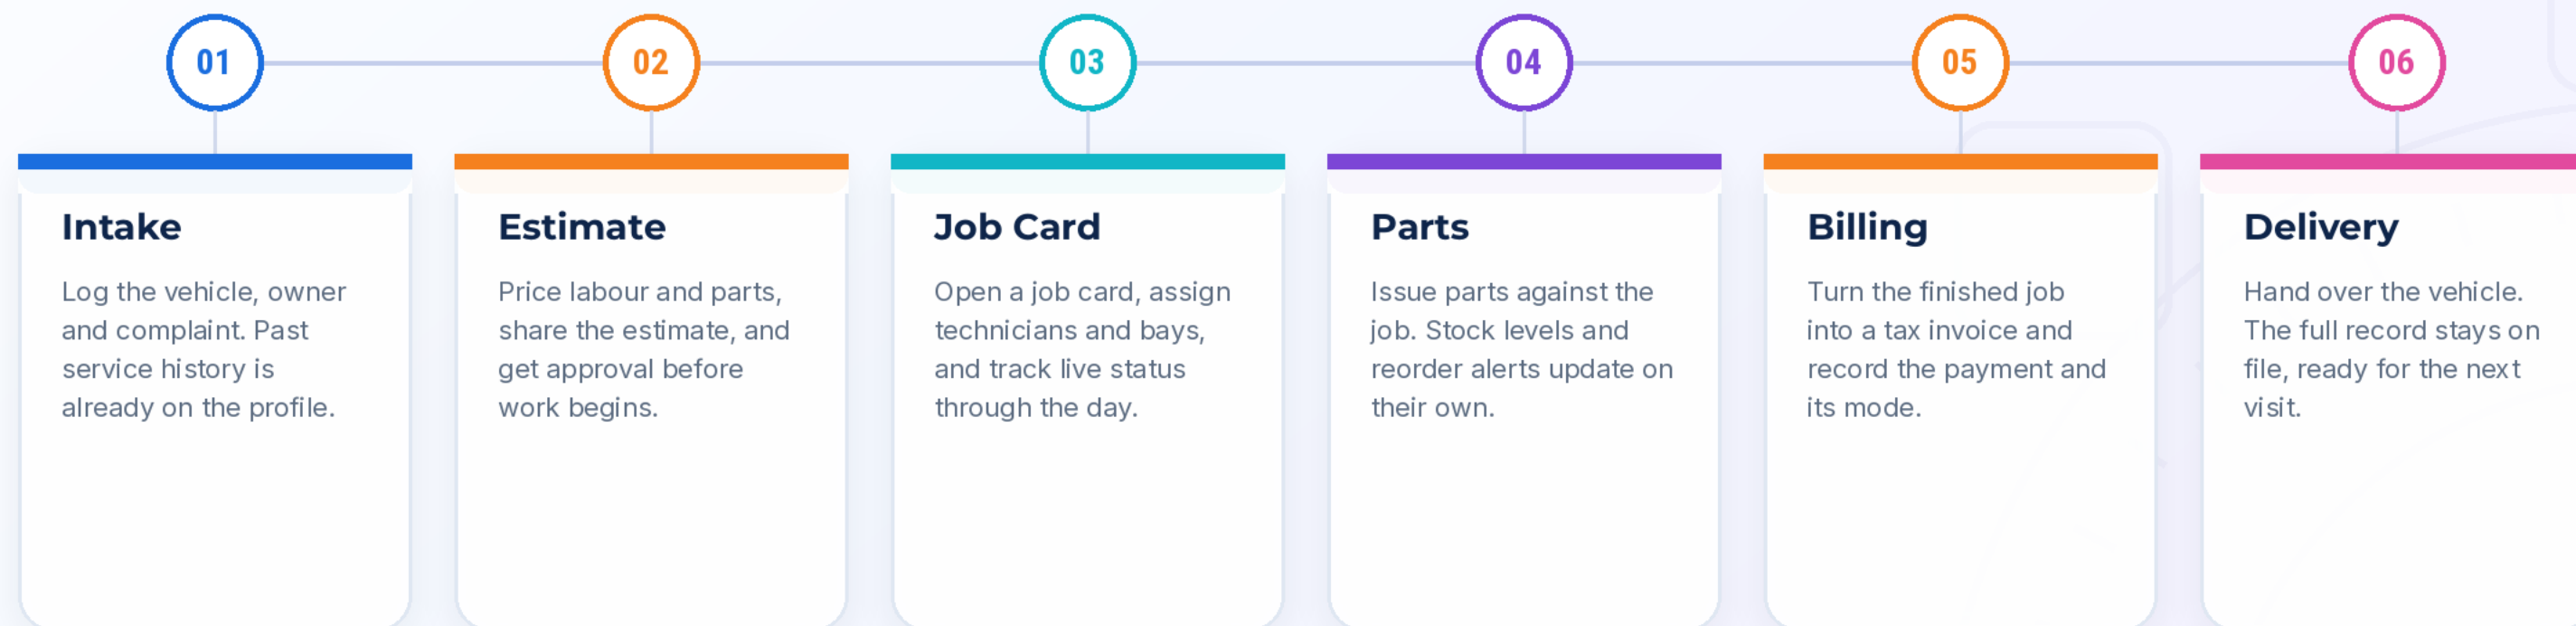

Reports & Analytics

Revenue, throughput, parts movement and branch performance at a glance.

HOW IT WORKS

From vehicle-in to delivery, one thread

A single job flows through every stage. Nothing is re-typed and nothing slips between the front desk, the workshop floor and the accounts table.

One continuous record — the estimate, the job, the parts and the invoice always agree.

BUILT TO FIT

Set up to match how you operate

Run Wheelint in the cloud or on your own dedicated server. Either way, the same secure, always-available platform sits behind your operation.

TWO WAYS TO DEPLOY

Cloud-Based

Fully hosted and maintained for you. Log in from any device, anywhere — nothing to install or manage on-site.

Dedicated Server

Keep data on your own infrastructure. Run Wheelint on a dedicated, secured server under your control.

WHAT STAYS TRUE EITHER WAY

Anytime, anywhere access

Front desk, workshop floor or on the road — the same live data on any device.

Role-based data security

People see what their work needs and no more, so records stay protected.

Reliable backups

Your records are backed up and safe, not sitting in a single fragile file.

Onboarding & support

Guided setup, data migration and a team that stays on after go-live.

OPERATIONAL VISIBILITY

Know where the business stands, today

Wheelint turns everyday transactions into clear numbers — what came in, what's pending, what's moving and where attention is needed. One branch or many, the picture stays comparable.

Revenue, pending payments and service throughput at a glance

Parts movement and stock exposure across every location

Branch and outlet comparison for multi-location groups

Exportable reports for accounts and management review

Reports & Analytics

Revenue

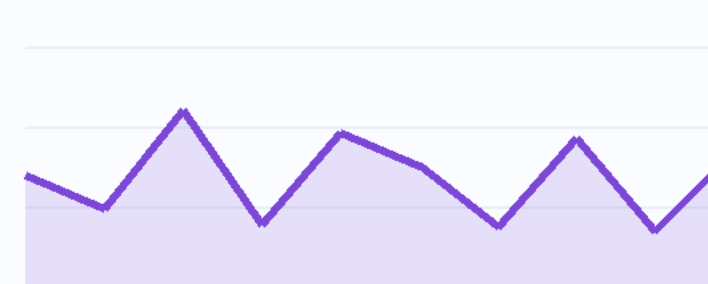

Service throughput

Pending payments

Revenue trend

Branch comparison

WHY TEAMS CHOOSE WHEELINT

Practical software, not a project

Automobile-focused

Built around vehicles, job cards and parts — not generic business software bent to fit a workshop.

Scales with you

Start with a single workshop and grow into a multi-location or enterprise setup on one platform.

Clear information

Records stay connected, so every report reflects what actually happened on the floor.

See Wheelint on your operation.

Book a walkthrough and our team will map it to your service, billing and inventory workflows.
